About Atacama Area.
Atacama it stretches from the highlands of the Andean Altiplano, over the golden sands of the Atacama Desert, as far as the shores of the Pacific Ocean. Diverse, surprising, majestic and untouched. This is the place for those in search of adventure with its breathtaking salt flats, hot springs and Andean volcanoes, vast expanses of land and here and there, occasional signs of life... llamas, vicunas, flamingos and alpacas, all unperturbed by the presence of man.

Your trip.
Your trip start in Santiago where our staff await you at the airport from your international flight. After accommodate in our hotel, we will check your personal mountaineering equipment according to our equipment list (see below). This is a very important step for our expedition, sometimes we discover some clothes not warm enough for climb Ojos del Salado volcano. In that case we can suggest some alternatives and also stores where you can buy or rent extra equipment (let us know in advance). Remember that Ojos del Salado could be a very cold mountain, at night temperatures could arrive at -20°C or less.
Andes Mountain Expediciones

Next day our driver will pick you up to carry you at Santiago airport to Copiapo, where our guide will await you and transfer to city. Hotel accommodation.

From Copiapo we will drive to Valle Chico, located at 3,200m. Next day, from here we to Santa Rosa, spending two night for acclimatization and then we will move to Laguna Verde, spending three nights at 4,200m. before go to Refugio Atacama camp At 5,200m.

We will discuss the philosophy and style of this part of the trip, prescription medications at altitude, the effects of Diamox (Acetazolamida), sanitation, water treatment, teamwork, techniques and advises to climbing a big volcano like Ojos del Salado.

Bring your personal duffel bag to put in your equipment such as crampons, mountaineering boots, technical clothes, etc.

We use Nonin Pulse oxymeters for high mountaineering expeditions. Every expedition has one of these instruments to measure the saturation of oxygen of each client allowing for daily control and safety in the route to the summit.
